### **Legislative Analyst's Office Proposed Budget Bill Language**

Provision X: Of the amount appropriated in this item, \$200,000,000 is for mandates claims, deferred maintenance projects, and other general purposes. The chancellor shall allocate this funding to all districts in proportion to each district's funded full-time equivalent students. From each district's allocation, funding shall first be deemed to satisfy any past mandates claims that have not been funded, as determined by the Chancellor's Office. Once a district's past mandate claims have been paid, remaining funding shall next be applied toward a district's deferred maintenance projects. If a district certifies to the Chancellor that it has funded all deferred maintenance, any remaining funds may be used by the district for any other priorities consistent with law.
